Hose assemblies covered by this certificate are approved to be used in the following media and temperature range:

Hose types	ALPI 3300 & ALPI 4000,	EVEREST 4000 & EVEREST 5000	PREMIER & PREMIER ONE
Petroleum based hydraulic fluids	-40°C to +100°C	-40°C to +121°C	-40°C to +120°C
Water based hydraulic fluids and Air	0°C to +70°C	-40°C to +70°C	-40°C to +70°C
Fresh Water	0°C to +70°C	0°C to +70°C	0°C to +70°C

Materials and material protection chosen for the specific system shall be suitable for the intended medium and environmental conditions.

The hoses are to be mounted in accordance with the manufacturer's instructions.

Flexible hoses are only to be used where it is necessary due to vibrations or flexible mounting of the machinery. The hoses shall not replace/be used where permanent piping is possible/required and must only be fitted in places where they are always accessible.

Flexible hoses of these types are not to be used in boiler fronts.

The cover of hoses for gaseous applications shall be pin-pricked.

Hose assemblies covered by this certificate shall not be used in systems subject to pressure below atmospheric or vacuum conditions (except - PREMIER & PREMIER ONE Hose types).

The outer end of the pipe coupling (performing the connection to the fixed piping) is not covered by this certificate and shall follow the below requirements:

- Flanged ends shall be according to a recognized standard.
- Slip-on threaded joints having pipe threads where pressure-tight joints are made on the threads with parallel or tapered threads, shall comply with requirements of a recognized standard. Limitations stated in DNV-RU-SHIP Pt.4 Ch.6 Sec.9 [5.2.6] to be followed.
- If these outer ends are going to be part of a mechanical joint as covered by DNV-RU- SHIP Pt.4 Ch.6 Sec.9 [Table 10], then they shall be separately type approved.

Production testing

All hose assemblies delivered under the DNV type approval scheme shall be subject to a pressure test at 1.5 times the maximum working pressure and shall be delivered with the pressure test report with reference to this type approval certificate.
